## Who We Are...

Mobile Hunting Solutions is a branch of Hill Country Bows. As mobile hunters ourselves, we are constantly testing and researching new products and methods that make mobile hunting better, safer, and more comfortable. Mobile Hunting Solutions was created to bring these products to the plain community.

## Mission Statement...

To share our passion for mobile hunting by providing top quality, innovative products to the plain community.

To promote education and understanding on safe, effective methods of use.

## Our Purpose...

Our company exists because of the ever growing interest and demand in saddle and mobile hunting. Your requests, comments and suggestions are vital for us to be your foremost supplier for innovative, quality, mobile hunting products.

## Advantages of Saddle Hunting

- **Extremely Lightweight Tree Saddles:** Tree Saddles are lightweight, making you more mobile. Perfect for the Public Land Owner! Make sure to check out our new Ultra-Light saddle hunting steps for the ultimate lightweight hunting pack.
- **Little to no noise:** With tree saddles, you don't get the noise typically associated with putting up tree stands.
- **Hunters Safety:** While there have been lots of hunters who have fallen from conventional tree stands, when saddle hunting correctly you are tethered to the tree from the moment you leave the ground until you step back on it after the hunt, making it almost impossible to fall.

Ropes and components are commonly rated at over 5,000 lbs. breaking strength, certified for climbing. We use the same type of ropes and fittings that rock climbers and tree trimmers depend on each time they climb.

Our saddle systems range from the extreme minimalist Recon to the deluxe comfort of the JX3 Hybrid Saddle Seat.

We have put together a selection of products from entry level to the latest ultralight gear.

## Product Selection

This catalog provides a brief introduction to saddle hunting and mobile climbing systems.

Space does not allow us to feature every product we have available, so please call us with your requests, we may have it on hand!

Due to remaining shortages and shipping issues, prices can change rapidly. **Prices subject to change without notice.**

**Order early to avoid the fall rush!**

*All metal products, platforms, etc. are subject to backorders and production delays.*

### Liability Disclaimer:

Any climbing activity can be dangerous. Knowledge is important. By placing an order with us, you, the customer, assume all responsibility to understand and apply safe methods of use. Mobile Hunting Solutions assumes no liability for injuries resulting from the use of any product we sell.

# Parts of a Tree Saddle

*Saddles are usually either single panel or two-panel. Both have their fans. We offer both styles, but do have a preference for two-panel saddles.*

## Saddle Seat

This is what you sit in.

## Waist Belt

Keeps the saddle from falling off when you stand or walk.

## Leg Loops

Prevents the saddle from slipping upward, a safety feature.

## Bridge

A rope or webbing bridge is what you clip into to support your weight.

## Lineman's Loops

One on either side of your saddle. Used with lineman's rope to keep you safe while climbing or positioning steps or platforms.

Most saddles also feature **Molle loops**. Loops are sewn into the saddle to allow gear items to be attached, such as pouches for your ropes, to hang sticks on when climbing, etc.

## Tree Tether Rope

The tether is your connection to the tree. It attaches to the saddle bridge with a carabiner clip, which is connected to the prussic knot. The prussic slides up or down to adjust your seat height and locks in place when tension is applied.

## Lineman's Rope

The lineman's rope keeps you safe during a climb and allows you to use both hands for setting sticks or steps.

## Saddles in Use

A saddle allows you to hide behind the tree, but still take a shot at any place around the tree.

Saddles accommodate most hunters including those who need extra support

# Getting Started in Saddle Hunting

To get started in saddle hunting you need 5 simple, but essential pieces of gear:

1. **Saddle**
2. **Tether Rope**
3. **Lineman's Rope**
4. **Platform**
5. **Climbing System**

Many experienced saddle hunters will modify or customize their outfit, but these are the basics you need to get started.

## Saddle

Your saddle is a large part of how comfortable you are in the tree, which determines how long you hunt and remain still.

There are 3 main saddle types being manufactured today, including Single Panel, Two-Panel and Hybrid Type saddles.

### SINGLE PANEL SADDLES

Single panel saddles have one fabric or mesh panel that supports your bottom. The benefits of a single panel are that they are the simplest design and require the least amount of adjustments.

### TWO PANEL SADDLES

Two panel saddles have two smaller panels of fabric or mesh that connect at the sides. This allows you to adjust the panels to suit your needs. The panels can overlap or touch to create a single panel feel, or slide them apart so one is under your bottom more and the other is higher on your waist. Sliding the top panel even higher gives more back support.

### HYBRID SADDLES

The JX3 Hybrid Saddle is in a class of its own. A comfortable mesh seat and back panel combine with adjustable side straps that let you find the perfect angle for your back. It's like sitting in your favorite lawn chair.

The down side is more bulk and weight. The webbing bridge and adjustment straps can look a bit confusing until you learn how to use them properly, but they include a good instruction manual.

## Tether Rope

The tether rope is what goes around the tree once you're at hunting height and connects to the bridge rope on your saddle with a carabiner. It's your lifeline in the tree. The tether will have a loop on one end and a stopper knot on the other end, with a sliding prussic knot that can be moved up and down the rope to adjust your position on the tree.

## Lineman's Rope

The second rope you'll need is the lineman's rope, which is similar to the tether, but has two carabiners – one on the prussic knot like the tether and the other on the loop end, which will allow you to remove the lineman's rope from your saddle by simply unclipping it from the lineman's loop on your saddle. The lineman's rope goes around the tree to stabilize you so you can hang climbing sticks or your platform hands free.

It's not worth risking your life to save a few bucks. Get both a tether and lineman's rope!

ARSENAL

ARSENAL™

## AIR™ SADDLE

### Minimalistic, Ultra-Light Comfort.

The lightest saddle ever built. For hunters who live light and move fast, the AIR™ delivers unmatched comfort and breathability - so light, you'll forget you're even wearing it.

Color: Bark Gray

Weight: 15 oz

**#1001K Saddle Kit | \$317.95**

**Includes:** Saddle, Pouch, 7mm Rope Bundle

**#1001 Saddle Only | \$179.00**

## CLOUD™ FLEXX SADDLE

**NEW!**

### TOTAL COMFORT. MORE FLEXIBILITY

The CLOUD™ FLEXX Saddle delivers the comfort hunters expect from the CLOUD™ platform in a lighter, more streamlined design. Expandable elastic side panels eliminate pinch under load, while optional spreader bar inserts maintain an open structure for even weight distribution. The Glyde™ Adjustment System provides smooth, precise tuning in the tree, and the breathable, low-profile design keeps your setup efficient and mobile. Complete with premium SideVault™ saddle pouches, FLEXX is built for hunters who want total comfort without added bulk or complexity.

Color: Dark Olive

Weight: 1 lb 8 oz

**#1002K Saddle Kit | \$332.00**

**Includes:** Saddle, 2 Pouches, 7mm Rope Bundle

**#1002 | \$219.00**

**Includes:** Saddle, 2 Pouches

Included left and right storage pouches.

Easy adjust Glyde™ Bridge system.

## CLOUD™ FREEDOM™ SADDLE

The CLOUD™ FREEDOM Saddle is built around a single mission—delivering unmatched comfort in the tree. Its Full-Support Cloud™ Comfort Panel spreads load across a broader support surface to eliminate pressure points and naturally cradle the hunter. Combined with the adjustable integrated backrest, the saddle allows hunters to settle in and stay comfortable for long sits—delivering a level of support and stability unmatched in lightweight saddle hunting. Built on the proven CLOUD™ platform, FREEDOM also allows hunters to fine-tune that comfort. The X2 Dual Bridge System adjusts pressure distribution and body position for a personalized fit, while the Glyde™ adjustment system provides smooth, precise tuning in the tree. When it's time to move, the saddle folds into a streamlined transport mode with magnetic closure, keeping your setup compact, quiet, and mobile.

Color: Dark Olive

Weight: 2 lb 1 oz

**#1006K Saddle Kit | \$443.95**

**Includes:** Saddle with built in Pouches, 7mm Rope Bundle  
Specify Standard or XL size

**#1006 Saddle Only, Standard | \$329.00**

**#1007 Saddle Only, XL | \$329.00**

Transport Mode featuring Fidlock® magnetic attachment for quick and secure transport in the field.

Built-in side pockets to store your tether, lineman's rope or any other accessories that you need.

Independent top and bottom Glyde™ adjustment X2 Dual Bridge system. Easy, silent adjustments.

## RZR™ SUB2

### Redefining Ultralight Performance

The first and only full-feature saddle platform under 2 lbs. SUB2 packs advanced design into the thinnest profile on the market, with a Front Tapered Comfort Edge built for hunters who demand maximum mobility and stealth.

Size: 12" x 11.5"

Weight: 1.95 lb

#1202 | \$329.00

## RZR™ ELITE

### The Ultimate Fusion of Portability and Performance.

At just 1-inch thick, this next-generation platform redefines packability, minimizing bulk and weight for extended treks while maintaining generous platform space and rugged durability. Engineered with your comfort in mind, the RZR™ ELITE debuts Arsenal's first tapered front edge, reducing foot fatigue and relieving arch strain during long sits. The innovative Cinch RopeLok™ system provides unmatched mechanical advantage, ensuring a tighter, more secure platform installation than ever before.

Size: 13.5" x 12.5"

Weight: 2.45 lb

#1205 | \$349.00

## RZR™ MAG3

Now delivering unmatched XL standing area with a large, angled front edge and a simplified fold-flat design. Built to take abuse and keep going, the MAGNUM delivers years of rock-solid, top-notch performance.

Front Tapered Comfort Edge

Silent Ropelok™ Connection

Platform Size: 16" x 14"

Weight: 3.4 lb

#1201 | \$299.00

Silent and secure Ropelok™ Connection.

Integrated Climbing Clip for convenient and ready storage when transporting or ascending the tree.

## CARBONLITE™

### Lightweight, Not Light Duty

The most advanced climbing sticks ever produced, utilizing ultra-high modulus carbon tubing + 7075-T6 components. No plastic, no cutting corners - only elite performance.

High Modulus Carbon Fiber

Axis Stacking System with Pat. Pending bumpers

7075-T6 Aluminum Steps & Teeth

Step: 17"

Weight: 1pk - 1 lb 1 oz | 3pk - 3 lb 3 oz

#ACL1 Single Stick | \$119.00

#ACL4 4 Sticks | \$398.00

Pair with aiders for a super light system.

Silent and Secure Ropelok™ Connection.

Axis Stacking [Patent Pending]. Stacks easily. Stays secure.

## MAXX STEP™ AIDERS

The MAXX™ Aider Series are the only climbing stick aiders designed to specifically reduce wobble, swaying and the struggling boot placement experienced when using traditional product offerings.

Extreme stability | resilient foot plate with four corner rope attachments

Safe climb visibility | glow-in-dark grip + reflective DuraBraid™ rope

Quiet + Extreme Durability | supported by two 1,100LB+ DuraBraid™ Ropes

Simple flat packing | integrated bungee cords with mating hook for stowing flat against sticks or other gear

Universal attachment | loop girth hitch around stick step and tighten sliding AiderLok™ for double secure step connection

- 8"W x 6.5"D Step Plate
- 10mm | 5/32" Thickness
- Total Weight
  - Single - 6.5oz
  - Double - 13oz
  - Triple - 19.5oz
- 300LB Rated Capacity

**#1351** Single | \$39.00

**#1352** Double | \$59.00

**#1353** Triple | \$69.00

Easily collapses and hooks to bottom step.

**NEW!**

## 7MM GLYDE™ TETHER

### Effortless Tether Adjustment

GLYDE™ Tether System delivers exceptionally smooth adjustment performance for saddle hunters. Built around the innovative GLYDE™ Adjuster, the system provides mechanical-like tether control while maintaining the simplicity and lightweight design of a rope tether. The complete system includes the compact MicroForge™ Auto Lock carabiner for secure attachment, a Hitch Breaker for easier downward adjustment, and a TreeLok™ disc to keep the tether tight against the tree. Together these elements create a streamlined tether solution that improves movement, control, and efficiency while hunting from the saddle.

Rope: 7.5mm DuraBraid™

Length: 7.5'

Adjustment System: GLYDE™ Adjuster

Carabiner: MicroForge™ Auto Lock Carabiner

**#1101 | \$69.00**

**NEW!**

## 6MM GLYDE™ LINEMAN'S

### One-Handed Control. Built for Climbing

The GLYDE™ Lineman's Rope delivers smooth, controlled adjustment for saddle hunters during ascent. The GLYDE™ Adjuster provides mechanical-like control with effortless one-handed operation, even under load. The compact 6mm rope reduces bulk while maintaining strength and durability, and the MicroForge™ Auto Lock Carabiner ensures a secure, climbing-rated connection. A Hitch Breaker allows easier downward adjustment under tension, giving hunters precise control over positioning as they climb. Designed as a complete system, GLYDE™ improves stability, efficiency, and confidence in the tree.

Rope: 6mm DuraBraid™

Length: 7.5'

Adjustment System: GLYDE™ Adjuster

Carabiner: MicroForge™ Auto Lock Carabiner

**#1102 | \$64.99**

## 7/6 MM GLYDE™ BUNDLE

### Compact System. Effortless Adjustment.

The GLYDE™ Tether + Lineman Kit delivers the most compact, easy-to-use saddle system available—combining climbing and hunting into one streamlined platform. Both systems are built around the GLYDE™ Adjuster, providing smooth, one-handed adjustment under load with consistent performance from ascent to shot. The compact rope designs reduce bulk without sacrificing strength.

Tether Rope: 7.5mm DuraBraid™

Lineman's Rope: 6mm DuraBraid™

Adjustment System: GLYDE™ Adjuster (both systems)

Carabiners: MicroForge™ Auto Lock Carabiners

**#1103 | \$114.95**

**NEO SLINGR™**

Legendary comfort, taken to the next level. Upgraded with plush neoprene padding across the entire sling, the NEO SLINGR™ cradles your knees like a hammock, reducing pressure and creating a relaxed, zero-gravity-style seated position for effortless long sits.

#1133 | \$34.00

**FASTSET™ PLATFORM ATTACHMENT**

Awesome innovation! The ease of a pull strap combined with the fast and silent Amsteel daisy chain hookup.

## APEX™ MOBILE HAND MUFF

Stay warm and ready in the stand with the APEX Mobile Hand Warmer, engineered for ultimate comfort and convenience. Built with PrimaLoft® Gold Insulation, the industry's best, it delivers unmatched warmth without the bulk. Designed for versatility, it can be worn with a traditional waist belt or seamlessly integrated with your hunting saddle—eliminating extra straps for a more streamlined setup. Whether you're deep in the backwoods or hanging in a tree, the APEX keeps your hands warm and your focus sharp, ensuring you're always ready for the shot.

#2150 | \$59.00

## MICRO RETRAX™ HOIST

Engineered from the ground up for mobile hunting, the MICRO RETRAX™ packs premium retractable performance into an incredibly small, lightweight profile. Its quiet mechanism, rubber-overmolded shell, and compact form make it the ideal hoisting solution for hunters who demand stealth, efficiency, and zero unnecessary bulk. 30' length.

### Ultralock SD Kit

Now the super comfy Ultralock saddle is available without the attached Haulers, so you can customize your setup by running it with or without pouches. Anyway you slice it, the SD is the King of Comfiness! The expandable seat opens for the perfect custom fit.

**#TULSD** **\$324.00**

Saddle Only - Medium

**#TULSD-XL** **\$339.00**

Saddle Only - Extra Large

**#TULSDK** **\$462.95**

**Kit Includes:**

- Saddle - Medium
- Ultralight Pouch & Compact Ropes

**#TULSDK-XL** **\$485.00**

**Kit Includes:**

- Saddle - Extra Large
- Ultralight Pouch & Compact Ropes

## Ultralock Saddle Kit

Our Expandable Saddle Body with Link construction creates a mega-comfortable saddle that expands and contracts with you throughout your hunt. Our new oversized Haulers with integrated skeleton frame make frustrating gear access a thing of the past. Finally, our new bomb proof yoke system means you can load up and not worry about keeping it in place.

### LINKS

Our Expandable Saddle Body allows the saddle to move with you while walking, climbing, and hunting. Links are removable, adjustable, and user replaceable. Hunters can dial in their specific comfort setting, and replace them if they wear out, get lost, or get damaged. You get two sets: 1 pre-installed, and 1 replacement set.

### HAULERS

Our brand new Hauler with built in IFS (Internal Frame Structure) is the first of its kind. Haulers work like a dream by providing an incredibly simple one-handed operation. They're sewn right into the saddle body which adds structure & comfort to the entire system. Finally, we added plenty of organization, and even a built-in grommet system for those who use a retractable gear hoist.

### MODULAR YOKE

If you have issues with your saddle not wanting to stay put where you like it, our Yoke will solve that problem. It's also removable in about 15 seconds. If you want to run in minimalist mode, drop the Yoke at home and head to the woods.

**#TULS** **\$459.00**

Saddle (no Ropes)  
Medium - 30" to 38" waist

**#TULS-XL** **\$479.00**

Saddle (no Ropes)  
XL - 38"+ waist

**#TULSK** **\$573.95**

**Kit Includes:**

- Saddle - Medium
- Yoke
- Compact Ropes

**#TULSK-XL** **\$593.95**

**Kit Includes:**

- Saddle - Extra Large
- Yoke
- Compact Ropes

## Ultralock Haulers

Introduced in 2023, the Haulers were an instant hit as hunters discovered easy one handed top zip access. Our internal frame structure makes frustrating gear access a thing of the past. A complete rappel kit will easily fit in one pouch. Multiple organization pockets in each. Now available for you to use on any saddle with universal Molle loops. The most storage capacity of any pouches we offer!

**#2024UH** **\$99.95**

per pair

## Carnivore 2 Panel Saddle

Fully adjustable independent panels allow you to adjust and fine tune your comfort for those all day hunts. The Quad Lock Utilibridge provides separate top and bottom panel adjustments for any position. The R.A.D. buttons allow the bottom panel to snap into the top for hassle free walking. A simple pop, and you have two separate panels.

**#TCRK** **\$487.95**

**Kit Includes:**

- Carnivore Saddle
- Ultralight Pouch & Compact Ropes

**#TCRS** **\$349.00**

**Saddle Only**

Specify Reg or XL Size

Available early August. Pre-order yours now to avoid the fall rush!

## Phantom XP Saddle

The Phantom XP is the perfect combination of lightweight, compact and max comfort. A 3½" expanding panel and adjustable comfort bridge loops provide an easy-tune custom fit.

**#XPK** **\$427.95**

**Kit Includes:**

- Phantom XP Saddle
- Ultralight Pouch & Compact Ropes

**#XPS** **\$289.00**

**Saddle Only**

Specify Reg or XL Size

## Predator V Platform

The Predator V sets a new standard for saddle platforms. The comfort angled front edge, traction tread and improved angle adjust knob make this one great platform. The post back has a Molle loop hook that makes it easy to slide into the back of your saddle belt.

**#PRVP** **\$209.00**

12" x 11½". 3.4 lbs.

## Universal Platform Pack

A great way to pack your platform. Throw in a few essentials, strap your sticks to the bottom, and go hunt.

**#UPP** **\$84.95**

## Comfort Pack Straps

Super comfortable upgrade for your platform pack. Recommended if you plan to carry more weight, such as sticks.

**#CPS** **\$34.95**

## Knusion KT

Extra thick for the most knee comfort, the Knusion XT is perfect for those extended sits in the saddle.

**#KXT**

**\$34.95**

## R.A.D. System

**Rapid Attach and Detach**

Our R.A.D. (Rapid Accessory Deployment) System allows you to quickly swap out pouches or other items on a saddle, backpack or any item with Molle loops. Silently snap on or off. Push in to attach, pull out to release.

**#RAD2**

**\$24.95**

2 Pack (2 pair)

**#RAD4**

**\$46.00**

4 Pack (4 pair)

## Mod Pockets

**Organize your life...your pack, duffle or whatever!**

Try a 3 pack, with small, medium and large pouches. Great for emergency kits, extra food, spare rain suit, etc.

**#MOD3**

**\$42.00**

3 Pack - 1 each Small, Med, Lg

**#MOD1**

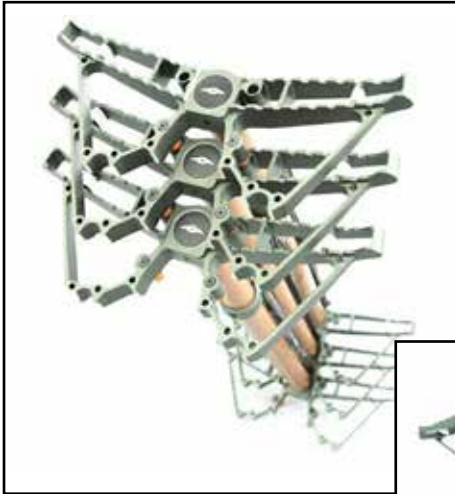

**\$23.00**

Single - Large

Fits rain coat, first aid, food, etc.

## ONE Climbing Sticks

The ONE climbing stick is the lightest full featured stick on planet Earth. The one piece step / standoff creates a generous boot step size for comfortable climbing and great traction. This stick is fiddle factor free. The Dynalite rope system with X-locking design is fast, silent and secure. Did we mention easy?

- 16.5 oz. per stick
- 3 pack weighs 3 lbs. 2 oz.
- 4 pack weighs 4 lbs. 3 oz.
- 18½" length
- 17" step to step
- 3 sticks stacked: 20½" long

**#ONE-M4** **\$569.95**

4 Stick Set

## Skeletors

Introducing the most feature packed climbing stick that won't break your budget. Skeletors come in 4-pack ready to hunt.

The Skeletors are built with a folding dual step design that folds AWAY from the tree. Folding away from the tree gives the hunter more room for their feet when climbing.

The Skeletors attach to the tree with our patented DynaLite rope and tab. It's the most user friendly, lightweight, simple and fast connection method in history. There are no heavy buckles. There are no mechanical pieces. There is no fiddle factor.

**#2009** **\$266.00**

Specs/Features:

- Total length (packed): 24"
- Total length (deployed): 20"
- Total length (4 pack): 27"
- Step-to-Step Height: 18"

## Workhorse Platform

The perfect compliment to any saddle hunting set up. Get 360° shooting around the tree with ease and comfort. A great blend of good platform size and minimal weight and bulk. Packs nice and flat for transport and attaches with the included cam strap.

Regular Platform Weight: 3 lbs.

**#WHP** **\$179.99**

Regular Platform: 12" x 13"

**#WHPXL** **\$189.99**

Extra Large Platform: 12" x 15.5"

## Platform Pack

Carry your platform with ease. Perfect for the minimalist hunter or that quick evening hunt. Molle loops on back allow you to attach gear or sticks.

**#WHPP** **\$56.00**

## Workhorse Climbing Sticks

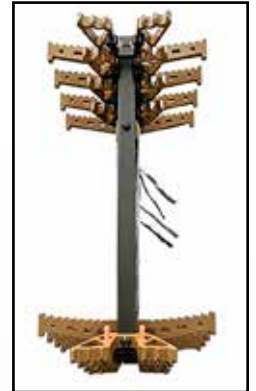

4 pack

Designed to be budget friendly, but still include all the most wanted features, and comes in a 4 pack to get you up there. The Workhorse climbing sticks attach to the tree with the patented Dynalite rope and locking tab. It's the most user friendly, lightweight, simple and fast connection out there. No buckles, nothing mechanical, no fiddle factor.

Stacking the sticks is a breeze with the stickloc pin system. Align the pins and stack. Weighs 8 lbs.

## Workhorse Backpack

Designed for hunters who demand function, durability and comfort in use. The built-in platform flap and wrap around compression straps keep your gear in place and easy to access.

**#WHBP** **\$165.00**

Bottomland Camo

## Knusion

Designed for saddle hunters who prefer a lightweight solution over bulky knee pads, the Knusion delivers unmatched comfort for long sits in the tree. Made from ultra light, high density foam, it offers the perfect balance of softness and durability without the weight or cost of traditional pads. Easy to pack and effortless to use, just hook it to the tree and settle in for the day. If comfort is your top priority, the Knusion is the way to go.

**#WHKN**

**\$29.99**

## Fold n Go Gear Hanger

The perfect companion to your HYS Strap. Simply slip into the loops, all set, folds up out of the way if necessary.

**#24FG**

**\$22.75**

## HYS Strap

The ultimate public land legal gear hanger. You can hang it. You can girth hitch it. You can T-Hook it. You can wrap it around a tree trunk. You can wrap it around a branch. Whatever works for you.

The HYS Strap is made of high strength, mildew and rot resistant polyester that enables you to hang your stuff in whatever way makes sense to you. Put some stuff around the back side of the tree, some on the left, and some on the right. You can easily move your gear and position it wherever it makes sense for your style of hunting. To attach it, simply girth hitch it with any of the existing loops, or use the included T-hook for a quick connection. If you hunt small trees, cut it to length. You won't hurt anything.

The Fold n Go (above) works perfectly with the HYS Strap. You can use S-Biner Hooks for your gear.

- 7' long can be cut to length for hunter preference
- Ultra-light at 6 ounces
- ¾" webbing for ultra-packability
- 1¼" distance between "links"
- T-Hook included
- Coyote tan for maximum concealment

**#5066**

**\$30.95**

HYS Straps are not intended for life support systems like a lineman belt or tether.

## TIMBER NINJA

OUTDOORS

## Ultimate Saddle

Outdoor Life's 2024-2025 Best Overall Saddle!

- Extremely lightweight 2-panel saddle (only 1.6 lbs.)
- Magnetic Platform Holder for hands-free setup.
- 2-Panel Comfort System minimizes hip pinch and Tacky Bridge maximizes adjustability
- NinjaMax Fabric —proprietary, quiet, durable and breathable
- "Mud Flap" Stick Carrier - carries up to 4 lightweight sticks
- Magnetic Stick Holders (Sides) - carries your sticks securely and quietly
- ASTM F3544-21 and ASTM F2337-22 third party tested – built with safety in mind

**#TNI** **\$360.00**

Saddle Only - Size Medium

**#TNI** **\$390.00**

Saddle Only - Size XL

**#TNK** **\$498.95**

Kit Includes:

- Ultimate Saddle
- Ultralight Pouch & Compact Ropes

## Ridge Pouch

Crafted from quiet, durable NinjaMax fabric with a foam-reinforced structure, the Ridge Belt Pouch protects your gear while staying low-profile and silent in the field. A two-way, highly water-resistant zipper allows smooth, one-handed access from either direction, while the high-vis orange liner makes gear easy to spot in low light.

- Dimensions: 10" L x 6" T x 2.5" W
- Non-Directional Design – mount on either side, as a lumbar pouch, or on any MOLLE surface
- Two-Way, Highly Water-Resistant Zipper – quick access from either side
- Foam-Reinforced Structure – holds shape and protects contents
- Universal MOLLE Attachment – fits saddles, backpacks, belts, and more
- Field-Tested Durability – dependable in the harshest conditions

**#TNRP** **\$46.00**

## Ridge Bottle Holder

Constructed from rugged NinjaMax fabric, the Ridge Bottle Holster is tough, quiet, and built for years of hardcore use. A high-vis orange liner makes contents easy to see, and a drain hole ensures water doesn't collect at the bottom. The wide opening and cinchable collar securely hold anything from a Nalgene to two saddle ropes. And with full MOLLE compatibility, it mounts effortlessly to your saddle, backpack, or other modular gear setups.

Features:

- Lightweight: Only 2 oz
- Dimensions: 6" tall (7.5" with collar), 4.5" wide, 14.5" opening circumference
- Fits Most Bottles: Securely holds a 32 oz Nalgene or smaller bottles with cinch-down adjustment
- Multi-Use Functionality: Works equally well as a dump pouch for ropes and accessories
- MOLLE-Compatible Attachment: Fits saddles, backpacks, and more
- Drain Hole at Base: Prevents water buildup during wet hunts

**#TNBH** **\$37.95**

## Kunai Hybrid Platform

Revolutionizing mobile hunting, the Timber Ninja Kunai is the first-of-its-kind hybrid saddle platform/tree-stand engineered for serious hunters who demand performance, stealth, and versatility. Built without a post, the Kunai provides maximum foot room and unrestricted movement, allowing you to confidently maneuver for weak-side shots or comfortably stand for hours.

**Features:**

- **Innovative Hybrid Design:**  
Uniting the best of a saddle hunting platform and a treestand, the Kunai eliminates the center post to create an open, stable surface that adapts to any hunting style.
- **Rock-Solid Stability with Folding Stability Spike:**  
The integrated Folding Stability Spike (FSS) ensures a rock-solid lock to the tree. It also folds away for ultra-slim packing when space is at a premium.
- **Unmatched Portability:**  
Weighing in at just 4 lbs 10 oz, the Kunai is one of the lightest platforms in its class. Combined with its ultra-flat folding profile, it packs effortlessly with the rest of your gear.
- **Precision-Machined Billet Aluminum Construction:**  
Crafted from aircraft-grade billet aluminum, the Kunai offers maximum strength and durability while keeping weight to a minimum. Rated for 300 lbs.
- **Optimized Dimensions:**  
With a surface area of 20" long by 16" wide, the Kunai provides the ideal balance of maneuverability and comfort for long sits and dynamic shot execution.

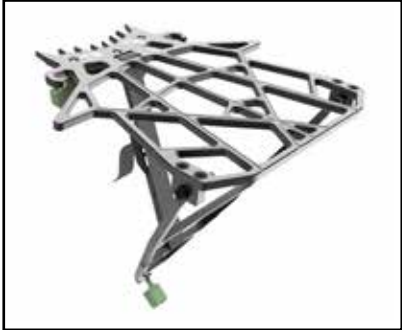

**#TNKP**

**\$459.00**

Cam Strap included

Available Mid Summer. Place your pre-order now!

### Mini Kunai Platform

Rock-Solid Performance. Minimal Footprint. Maximum Mobility.

The MK (Mini Kunai) delivers the same bomb-proof stability as the original Kunai in a smaller, lighter, and more packable platform. Built for mobile hunters who want confidence underfoot without extra bulk, the MK is the perfect balance of strength, simplicity, and efficiency.

**Features:**

- Ultra-Lightweight: Just 2.2 lbs
- Compact Platform Size: 12" x 11"
- Folds Flat: Under 1 inch thick for easy packing
- Rock-Solid Kunai Design: Proven stability in a smaller footprint
- Built-In Foot Rest: Increased comfort and versatility on long sits
- Folding Stability Spike: Locks the platform tight to the tree
- Includes Cam Buckle Strap: Fast, secure setup
- Highly Packable: Ideal for long hikes and aggressive mobile setups
- Weight rating: 300 lbs

The MK is built for hunters who count ounces, move fast, and demand absolute reliability.

#TNMK **\$339.00**

### Carbon Sticks

Stronger. Lighter. Dead Silent.

Timber Ninja's latest innovation and the premium evolution of the industry's first carbon fiber climbing stick, the C1. Re-engineered for maximum foot room, ultra-light packability, and complete silence, the C2 carbon climbing stick is the most advanced solution for serious mobile hunters.

Whether you're scaling your next big woods setup or navigating a tricky tree, the C2 climbing sticks delivers rock-solid security, comfort, and stealth—every step of the way.

**Features:**

**Next-Gen Carbon Fiber Construction**

Built from our proprietary carbon layup for extreme strength, featherlight weight, and a finish that's silent and warm to the touch—even in freezing temps.

**Wider, More Comfortable Steps**

The new 9" CarbonTek steps feature an aggressive non-slip tread and dead-silent performance, giving you better support and confidence in every move.

**Magnetic Stick Stacking**

No straps, no noise. Our built-in magnet system locks up to 4 sticks together for fast, secure, and quiet pack-ins and outs.

**Glow-in-the-Dark NinjaGlow Caps**

Top and bottom glow-in-the-dark rubber end caps make it easy to find your footing in low-light conditions—without fumbling for your headlamp.

**Ultimate Tree Bite**

The 4.5" standoff offers optimal clearance and grips tightly to the tree to prevent kick-out or shifting during the climb.

**Attachment Flexibility**

Includes an amsteel attachment method.

## Method 3 Saddle

The Next Evolution in Two-Panel Saddle Design.

At its core, the Method 3 is built for one thing: total adaptability without compromise.

Assembled in the USA.

**Upgraded Panel Management** - We've replaced the clunky clips, snaps, and straps with a fully reengineered magnetic panel system. A continuous magnetic strip now delivers smooth, intuitive transitions between transport and hunt mode - no more lining up individual magnets. Pair that with an all-new drawstring system for fast, seamless panel deployment and adjustment. Once dialed, your panel spread locks in - no need to reset your panel distance every time you climb.

**Built-In Versatility** - The drawstrings don't just manage your panels - they double as a way to carry climbing sticks up the tree. Smart design, zero waste.

**Real, All-Day Comfort** - Plush, breathable, and water-resistant padding lines the Method 3 for serious comfort in any conditions. A new uniform panel structure optimizes weight distribution and eliminates pressure points - keeping you locked in and hip-pinch-free from sunup to sundown.

**#LATM3K \$429.99**

- Kit Includes:**
- Saddle - Specify Med or XL
  - Compact Vaporline Ropes
  - Mesh Pouch

**#LATM3 \$299.99**

**Saddle Only** - Specify Med or XL

## Lonestar Saddle

The Lonestar single-panel saddle is designed for maximum comfort, featuring our patent pending Cradle Chassis constructed with 4-inch webbing delivering twice the support surface area, redefining what comfort in a saddle feels like. This combined with the Lonestar's Stretch Pleat ensures perfect weight distribution and is especially suited for larger framed hunters.

The design also features a unique Hip Pinch Reduction System that prevents the saddle from collapsing on itself and ensures even pull from the top, bottom, and center of the saddle - no more pressure points, just solid, unwavering support. Inside,

we've lined it with breathable Airflow Padding that keeps you cool in warm weather conditions. It comes stock with our metal-free rope belt, but if that isn't your style, it's ready to run with a standard buckle belt too. **SIZING:** Regular fits 32"-38" waists; XL fits 38"+ waists

## Covert Ultra Saddle

The Covert Series got an overhaul! The Covert Ultra maintains the same frame and support that the Covert Lite and Pro were praised for, but is now 40% lighter. The overhaul included lighter materials/webbing, reduced-weight buckles, an adjustable pass-through belt, and an ultra-high strength bridge. It delivers the same industry-leading comfort that Covert users raved about, including fitting all sizes, especially larger hunters. With endless adjustability, it provides all-day comfort without pinching, cramping, or stiffness. The Covert Ultra sets the standard for saddle hunting comfort without sacrificing weight, at an affordable price.

## JX3 Hybrid Saddle System

Hunters choose the JX3 Hybrid because it delivers comfort, mobility, and reliability in one lightweight package.

**All-Day Comfort:** The contoured seat and backrest eliminate pressure points and fatigue.

**Lightweight Mobility:** With its folding backpack design and lightweight materials, it's easy to carry deep into public land or rugged terrain.

**Safe & Durable:** Every rope, buckle, and strap is tested beyond industry standards.

**Real Results:** Hunters report longer sits, smoother climbs, and more consistent success.

The Hybrid is designed by hunters who know what matters—comfort, confidence, and a setup you can count on every season.

Mesh seat & back

#1115

\$499.00

**Specs/Features:**

- 13 lbs.
- Tether and Lineman ropes are included

**OVERSIZE**  
SHIPPING CHARGE  
Add \$12.00

**Use Tip:** We suggest taking off your prussic and adding a Ropeman 1 to your tether. This will make it much easier to adjust your position.

## How to Use the Hybrid

The JX3 Hybrid Hunting Saddle is built for simplicity and comfort. Whether you're a first-time saddle hunter or a seasoned pro, setup is quick and straightforward.

**1. Securely Climb**— As with all saddles, climb utilizing the lineman's rope, and once at hunting height, unfold the seat frame (if you haven't already), secure the bridge strap to the opposite upward facing loop via carabiner, girth hitch the tether rope around the tree at about head height, and attach the tether rope to the center of the bridge strap via the tether rope carabiner. At this point, simply sit down by loosening the lineman's rope, and as the tether rope takes the load, the seat will be secured under you.

**2. Adjust for Comfort** – Fine-tune your seat, backrest, and straps until you find your perfect balance.

**3. Find Your Angle** – Take advantage of the 360° shooting range and move quietly around the tree for the best shot opportunities.

With the Hybrid, you'll spend less time adjusting and more time hunting comfortably and confidently.

# JX3 Hybrid Saddle

Adjustable, reclining back.

Packs in like a backpack.

Adjustable fork keeps knees away from the tree.

## Proper Lineman's Belt and Aider Use

A lineman's belt is a great positioning tool for hands free work, but is **NOT a Life Safety Support!** You can still get hurt if you would happen to fall.

Using aiders has become very popular because it is a simple way to gain extra height with minimal added weight. Aiders vary from single steps to 3, 4 or even 5 step aiders. Most are made of webbing or tough, but light-weight Amsteel® rope. Aiders are either fixed (stay on the stick), or movable (only one aider is used) and you move it up with you as you climb. There are several important things to remember when using aiders.

1. Short aiders are less likely to swing or "kick out" than longer aiders.
2. As will all climbing, aider use requires using care and the proper methods of use.
3. We believe the following method is the **safest way** to use an aider.

1. Lineman's belt properly angled up. Hands on belt for stability. Adjust slack as needed.

2. Foot properly seated in aider. Keep toe firmly against the tree. **This is extremely important!**

3. Move the belt up with **every** step! Never let it go below waist high.

4. Foot is properly set in aider, with toe firmly against the tree. Leaning your weight into the belt helps maintain your balance.

5. Ready to move up again. Always adjust slack to keep as close to the tree as possible.

# Tether Attachment Options

## Common Girth Hitch

Pass line through loop

Pull down to tighten. Putting slack on the rope may cause it to loosen!

## Optional Tether Quick Attachment, Release with a carabiner.

**ALWAYS fully lock your carabiner!**

Clip through loop

Pull down to lock. If done properly it should stay in place when load is removed.

Pulling sideways will easily open the loop, allowing quick and secure position changes. Push carabiner in while pulling on main line to relock.

**Oval Carabiner**  
**Recommended**

**#4070**

## Bullman Ring of Steps

At 2 lbs., and super compact, the Bullman Ring of Steps allow you the full range of movement around the tree.

**#BROS \$149.00**

5 Steps. Ratchet strap included.

## Platform Buddy

Now you can easily improve your ability to maneuver all around the tree by adding one or two platform buddies to the cam strap on your platform.

Designed to provide side stability, not as a load bearing step.

Improve  
your platform  
mobility

**#MERPB** **\$25.00**

Per each. Strap not included.

## Bullman Platform Step

Beef up your platform game by adding a platform step to your platform cam strap. Simply slide the step where you want it and cam down your platform.

The best platform step available!

**#BPST1** **\$29.00**

Per each. Strap not included.

## Climbing System Guide

What's the best way to climb a tree? How do you get up the tree? We get asked these questions a lot. This Climbing System Guide is based on over 20 years of experience using, testing and researching many different climbing methods.

### ■ Climbing Sticks

Sticks are the fastest way up a tree, especially when used with multi step aiders. They are the easiest for most people to learn. The drawbacks are: bulkier, heavier and often noisier. Using stealth strips on your stick contact areas will really quiet them down. Recently much lighter sticks have been introduced such as the Hyperlite, Carbon SS and The Tethrd One. These will cut weight by about one half.

### ■ One Sticking

One sticking is simply using only one stick, usually with a multi-step aider and a specially modified stick with a built on platform. It appeals to many since it lets you climb any tree to any height with only one stick. It is also very compact and lightweight.

### ■ Rope Climbing and 2TC Climbing

It doesn't get lighter or more compact than 2 Tether Climbing (2TC). It's not difficult, but takes time to get the feel for it. Properly done, you can climb any height and back down. Rope Climbing or single rope technique (SRT) requires 30 or more feet of rope and several specialized fittings and learning how to use them. When done properly, rope climbing is the safest way to climb and descend a tree. However, strict attention is required to correct safety methods at all times.

One Sticking, Rope and 2TC will commonly use rappelling as the way to descend a tree since it is the safest and fastest way down. Plus, it's really pretty fun!

A lineman's belt allows hands-free set up.

Using aiders for more height.

## Vulcan Climbing Sticks

A climbing stick that's budget friendly, easy-to-use and locks on tight with the included cinch strap.

- 4 pack
- Single tube design
- Fixed double steps
- 19¼" long
- Distance between steps: 17¼"
- Step width: 9"
- 4 pack weight: 7.2 lbs.
- Per stick weight: 1.8 lbs.
- Standoff height: 4½"
- Easy-to-use cinch strap
- Fits 4" - 22" tree diameters
- Weight limit: 350 lbs.

**OVERSIZE SHIPPING CHARGE**  
Add \$12.00

**#TLRS \$199.99**

Pack of 4 sticks

## Bullman Ultralight Step System

A step to climb a tree that was small and lightweight but was still solid underfoot has been a dream for many.

Something that you didn't have to spend a lot of energy screwing into the tree. A step that was easy to attach and also easy to remove would be awesome... and it needs to be light!

We got you!

The Origin Step is the result of half a life-times obsession with climbing trees to hunt deer.

**#BMOS \$29.99**

each

You will usually need 8-10 steps. We are developing an aider system for these. Call with questions.

## Super Compact V-Step System

Light – Quiet – Wide Comfortable Step

This is one of my favorite climbing systems. Putting two side by side on the tree makes an excellent saddle platform.

Fast, silent hook up.

Steps nest together nicely

with 3 step Amsteel® aider

Shown with 4 Step Hook Aider

**#4027** **\$84.60**

See page 82 for photo.

3 Step Hook Aider

## 2TC - Two Tether Climbing

**USE TIP:** Stiffer rope such as 9mm or larger works best. Not recommended when using the 8mm Predator rope.

The Quick Connect Tether option on page 47 is great for 2TC.

By adding a few small pieces of gear, you can now climb with just your saddle and ropes. By utilizing a foot loop on your second rope, you create a stand up – sit down climb method.

**Here's how it works:** Your tree tether is connected to the tree and moved as high as you can reach. Your lineman's belt is connected to the tree like a tether rope, about 12" lower than your actual tether rope. Your foot loop connects to the lineman's rope. This is for your left foot, for most people. Your saddle is hooked to your tether and as much slack taken out as possible. See photo sequence below.

Foot loop set.

Ready for the first step up.

First step up.

Move your tether rope up, then sit down.

With your right knee braced against the tree, move your foot loop tether up.

Grab the tree and stand up for the second move up.

### 2TC Complete Kit

Includes: Foot loop, Quick link, Ropeman 1 rope grab and a carabiner\*. The quick link allows easy on and off when you need to go above limbs, and the ropeman lets you raise your loop foot a good bit higher on each move, for faster climbing.

\*Also includes a 1/8" Amsteel® Daisy Chain to use as an extra safety tether when you need to move around branches.

**#2TCKIT \$110.00**

### Adjustable Foot Loop

**#2TCLOOP \$12.00**

## One Sticking

### Why One Stick?

- Carry Less weight and bulk.
- More options in hunting height. Easily, and safely, climb 20, 30 or more feet.
- Use virtually any tree that your rope can reach around. (Don't climb a 4" tree, ok!)
- Allows you to quickly reposition to a different tree if needed.
- Rappelling down is the safest descending method. No worry about slipping or missing steps in the dark.

### What you Need:

Sticks especially designed for one sticking make it much easier and smoother. Sticks with attached platforms mean you don't need to carry a separate platform. Almost all one sticks have a cam cleat and rope for quick and easy attachment and removal. A rappel kit allows you to easily and safely descend. See page 63 for rappel information.

**1.** Be aware of how the tree leans before starting up.

**2.** The linemans rope helps steady your climb. For extra safety, also attach your rappel rope to your saddle.

- 3.** Fasten rappel rope to the tree, attach rappel rope to the saddle and clip lineman's belt out of the way.

- 4.** With your descender, lower to a sitting position and remove your stick.

- 5.** Fasten your stick above you again and repeat climb process, using both ropes for maximum safety.

- 6. VERY IMPORTANT!** Always move your tether up with each step to reduce slack.

- 7.** A good platform will increase all day comfort and allow better positioning for unexpected shot opportunities.

- 8.** Use your knees to help position and stabilize your shot. Knee pads are advised.

## Shikar One Stick

Measuring only 12" long and weighing in at 1 lb. 13 oz. fully loaded with a 3 step aider attached. If you use a separate platform and just need a way up the tree, this will do it in a very small package.

Standard stick will come with 3 step aider.

#SOS3

\$275.00

Features the new non-moving Hunt Cleat attachment method.

For more information on the Hunt Cleat, see page 75.

## The Frank One Stick

For 2026 we bring you The Frank One Stick, which features roomy platform and an angled front edge for foot comfort.

A great choice in a value priced one stick.

Platform size: 8"D x 13"W x 1 1/2"H

Weight: 4 lbs. 4 oz.

Comes with 3 step aider

#FRANK1

\$385.00

**OVERSIZE**  
SHIPPING CHARGE  
Add \$12.00

## Sweet Spot One Stick

**NEW!**

It's finally here! The perfect subcompact one stick for the minimalist hunter. This one hits the "sweet spot."

Super lightweight, packs small with a 6" x 10" platform that has a slight angled front edge to greatly aid foot comfort.

At only 2 lbs. 13 oz. and 12" long this stick will become your new favorite ultralight companion.

**Note:** Also available with a flat top.

**#SWST \$370.00**

Comes with a 3 step aider

## Solo One Stick

The most compact, fully functional one stick available. At only 2 lbs. and extremely compact, this is just the ticket for the minimalist hunter. The platform base provides a solid bite on the tree with the unique cam over feature.

The tree rope is the HFASR attachment system with sliding friction knot. This is a super strong, feather-weight and completely silent attachment method that simply hooks over the platform button. The HFAS is featured on page 76.

The 4" x 10" platform has a grooved surface for good boot grip when maneuvering for a shot.

**#SOLO1 \$260.00**

**Specs/Features:**

- Weight: 2 lbs.
- Size: 10" x 6" x 4"H

## Slick Rick One Stick

The ultimate One Stick!

The Slick Rick is the first one stick to be equipped with both a folding top and folding bottom platform for incredible packability. The Slick Rick utilizes an adjustable top platform to give the user the most comfortable angle for your feet.

Fully set up with a 3 step webbing aider

#SR100

\$495.00

**Specs/Features:**

- Length 12"
- Platform - 8" x 13"
- 4.2 lbs.

Packs flat!

## Pinch Point One Stick

Lots. Of. Foot. Room. That's what this stick is all about. Works great with the Kozy Kote body suit, or if you just prefer the maximum amount of foot room. For easier climbing, the front section folds up out of the way and can be used as a grab handle to release your stick.

Completely set up with a 3 step webbing aider

#PP2412

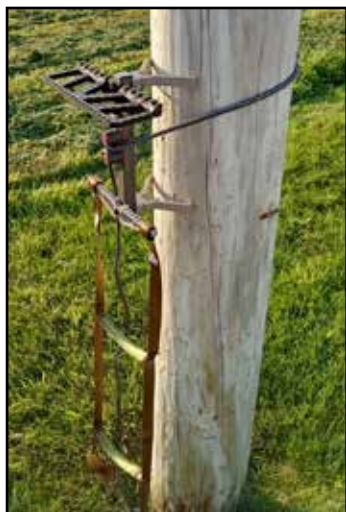

\$525.00

**Specs/Features:**

- Length 12"
- Platform - 10" x 14"
- 5 lbs. 11 oz.

## MHS Scout One Stick

A handy size stick featuring the popular compact Scout platform. Completely set up with 3 step aider. Pull up handle included.

**#24S13** **\$330.00**

**Specs/Features:**

- Length 15"
- Platform - 4" x 10"
- 2 lbs. 14 oz.

Available flat or angled.  
*If unsure, order flat*

## MHS Lil Joe One Stick

The "Lil Joe" platform folds up for easier packing and has a angle adjustment knob. Completely set up with 3 step aider.

**#24LJ3** **\$398.00**

**Specs/Features:**

- Length 15"
- Platform - 6" x 9½"
- 3 lbs. 1 oz.

## Rappel Systems

### What is a rappel kit?

A rappel kit is a compact, lightweight system that gives you complete control on the descent. No improvising. No white-knuckling it down a climbing stick you're suddenly not so sure about. Just a clean, controlled return to the ground every time.

A rappel kit has five core components:

#### 1. The Rappel Rope

This is the backbone of the system. Most hunters run about 40 feet of rope — enough to handle steep terrain, uneven banks, and the occasional taller-than-expected hang. The **Rubicon 9mm** is a popular choice among serious saddle hunters for its balance of durability and packability.

#### 2. The Descent Device

This is where control actually happens. Mechanical descenders like the **Mad Rock Safeguard** or the **Vergo** automatically grip the rope and feature a smooth operating handle for a fluid, controlled descent.

#### 3. The Carabiner

Your carabiner connects the descender to your saddle's bridge making it your primary point of attachment. This is no place to cut corners. Always use a climbing-rated, locking carabiner like the **Oval Screw Gate Carabiner**, built specifically for the demands of elevated hunting heights.

#### 4. The Quicklink

The quicklink is your anchor point at the top of the tree. Rather than feeding all 40 feet of rope through a loop around the tree, the quicklink allows you to girth hitch your rope quickly and cleanly — saving precious time, especially when navigating branches. Always deploy your lineman's belt before setting this up.

#### 5. The Dynaglide Retrieval Line

This thin cord does two critical jobs: it retrieves your rappel rope from the tree after your descent, and it doubles as a gear pull-up rope. Attach it to your rope just behind the quicklink **BEFORE** you start coming down. Skip this step, and you're climbing back up to get your rope. This is a mistake most hunters only make once.

Attaching pull down cord.

Removing the stick

Down you go.

## Rappel Systems

### Why Rappelling Isn't Just for One-Stickers

Here's the reality: every climbing system can have its own issues. A stick can kick. A strap can slip. A step can shift at exactly the wrong moment. When that happens 25 feet off the ground, your options narrow fast. A rappel kit changes that equation entirely. No matter how you climbed up, you have a controlled, reliable way back down. It isn't just safety gear. It's your exit strategy.

#### 5 Rappelling Mistakes Saddle Hunters Make (and how to avoid them)

Even experienced hunters can develop bad habits. Here are the most common rappelling mistakes - and how to make sure you're not making them.

##### 1. Forgetting to attach the Pull Cord before descending.

This is the most common and most frustrating mistake in rappelling. Once you're on the ground, there's no retrieving your rope without climbing back up. Always attach your retrieval line to the rope before you start your descent.

##### 2. Using non-rated hardware.

Not all carabiners are created equal. Using a non-climbing-rated carabiner as your primary attachment point is a risk that simply isn't worth taking. Every single piece of hardware in your rappel kit should be rated for climbing loads. No exceptions.

##### 3. Skipping the lineman's belt during rope setup.

Setting your rope and quicklink around the tree without a lineman's belt for backup is one of the most common safety shortcuts in the tree - and one of the most dangerous. Always have yourself secured to the tree at all times!

##### 4. Using a rope that's too short.

Forty feet is the standard for a reason. Hunters who try to get by with less frequently find themselves short on steep hillsides, elevated banks, or unexpected terrain. Don't guess - use a rope you know will reach the ground.

##### 5. Improper descender setup.

A mechanical descender loaded incorrectly won't brake the way it's designed to. Before your first hunt of the season, run through your descender setup on the ground. Know your device, know how it loads, and know how the handle operates before you're 25 feet up in the dark.

The right hand controls speed of descent. The left hand opens the brake handle. Always use both hands!

After descending, pulling the loop away from the tree will open the loop. Pull until end is completely free.

Step away from the tree when using the pull down rope. The rope loop will open up more easily.

On a straight, limbless tree, the rope simply falls down.

## Rappel Safety Guidelines

### Backing up a descender.

When you leave the ground to climb, it is always a good idea to have a backup connection to the tree.

Descenders such as the Madrock Safeguard or the Vergo are very popular and have performed reliably and safely for many years. Even so, both manufacturers recommend backing up the mechanical device with a rope friction hitch for maximum safety.

Using a backup requires you to use both hands to control your descent, meaning if you let go with one hand, you will automatically stop.

We recommend using a 4 wrap Heddon hitch, tied with a 19" prussic loop. The Heddon is simple and can be tied in the dark, or even with your eyes closed. A 19" loop is now included with all our complete rappel kits.

### Descending with a Backup

The hitch needs to be pushed down to loosen (break) its hold on the rope. Downward pressure must be maintained while your other hand releases the device brake handle to begin descent.

Letting go of the hitch will cause the hitch to tighten and stop you.

Tying the Heddon Backup Hitch

1. Start with a 19" prussic loop as shown

2. Wrap end behind and over rope

3. Continue wraps

4. Complete 4 wraps

5. Bring end down through bottom loop

6. Snug loop up neatly (dress) and pull down to tighten

Your carabiner should be turned so you do not need to unclip from your bridge. **Important:** For the Vergo, the loop should be installed behind the device as shown. For the Safeguard, install the loop in front (facing you).

7. Clip to carabiner. Important

8. Connected

## Introducing...Rubicon 9mm Rope

The features you want:

- Very flexible
- Packs down small
- Tough and durable
- 9mm diameter for smoother feeding through your descender

### 9mm Safeguard Rappel Kit

This compact and versatile kit features the Madrock Safeguard descender paired with the smooth handling 9mm Rubicon rope.

**#26SG40**      **\$255.00**

### 9mm Vergo Rappel Kit

We are excited to introduce our new 9mm Rubicon rappel kit. The Rubicon rope is nice and flexible and feeds smoothly through the Vergo descender. The Vergo is easily attached or removed from the rope. In our experience, the Vergo tends to feed rope a bit smoother than the Safeguard.

- 40' of 9mm Rubicon Rappel Rope
- Vergo Descender
- Quick Link
- Carabiner
- Pull Cord Spool with Clip
- Instructions
- Tether Locker Clip
- 19" Prussic Loop for Backup

**#26V940**      **\$255.00**

### 8mm Voodoo Rappel Kit

We are excited to introduce our Voodoo 8mm compact rappel kit. The new 8mm Voodoo rope is nice and flexible and feeds smoothly through the Vergo descender. The Vergo descender is the best option we have found for 8mm rope. The Vergo is easily attached or removed from the rope. In our experience, the Vergo tends to feed rope more smoothly than the Safeguard.

- 40' of 8mm Voodoo Rappel Rope with Sewn Eye
- Vergo Descender
- Quick Link
- Carabiner
- Pull Cord Spool with Clip
- Instructions
- Tether Locker Clip
- 19" Backup Prussic

**#268VK**      **\$255.00**

# Build Your Own Rappel Kit

## Choose Your Rope:

Standard is 40' with sewn eye.

We can custom order any length rope.

**8mm Predator, 40'**

**#2546 \$16.00**

**Tether Locker**

**#5074 \$18.00**

40' Spooled with clip

**#ACPRL \$22.00**

## Options:

**Quick Link**

**#2541 \$14.00**

**Backup Prussic Loop , 19"**  
for making the Heddon Hitch

**#26PL19 \$24.00**

**Backup Prussic Loop, 13"**

**#26PL13 \$19.00**

**Notch Quickie Link**

**#KV3 \$67.00**

**Oval Carabiner**

**#4070 \$17.99**

**Black Diamond Carabiner**

**#4071 \$15.99**

**HMS Carabiner**

**#HMSC \$22.95**

## Rappel Hardware

### Mad Rock Safeguard

Ascending, descending device for climbing and rappelling for 9mm to 11 mm ropes. Auto locking and attaches quickly and easily.

**#2047** **\$119.00**

### Vergo Descender

We are excited to offer this descender to you as another solid option for rappelling and one sticking. Clips on and off the rope easily. We find the Vergo makes it easier to control the rate of descent. The release pad opens a little slower, which gives a smoother descent.

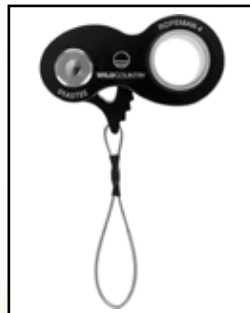

**#25VD** **\$119.00**

### Notch Quickie Link

Here by popular demand – The Notch V3 Quickie is one of the most popular "quick link" options for saddle hunters! Quickly slip the roll pin out and in. Double safety action ensures secure connection.

**#KV3** **\$67.00**

### Kong Duck

Kong Duck rope clamp for 8 - 9 mm ropes. Works great on your lineman's belt or your tree tether to quickly adjust length with one hand. These come in black and are an excellent replacement for a prussic. If you are using a lighter rope in the 8 - 9 mm range, this is the mechanical rope clamp you should be using. Must be used with oval carabiner.

**#4072** **\$75.99**

### Ropeman 1 Rope Grab

Silky smooth, easy, one-hand adjustments for your lineman's or tether rope. 9mm to 11 mm rope.

**#4074** **\$59.99**

Ropeman 1 installed on rope

## SRT Climbing (Single Rope Technique)

Using the Compact SRT Kit

Adding a SRT system to your rappel kit allows you to climb back up your rappel rope. It's quite handy if you drop something, answer nature's call or want to leave the rope in the tree for multiple hunts. A very fast way up a tree.

**Getting a Rope in a Tree.** The two best options are using a throw ball to get a throw line over a sturdy branch or using a paracord preset which needs to be placed beforehand. Paracord is left in the tree and you use it to pull your climbing rope up when you get to the tree. It is extremely important that you know how to safely get your rope attached up in the tree.

### Using a Foot Loop with the Quick Roll

Notice the correct shortened bridge length. Foot loop is clipped to the ascender. Safeguard is connected to saddle.

Push ascender up.

Standing up while pulling on the rope advances you up easily.

### Using The Quick Roll (no foot loop)

Push ascender up.

Simply pull up to advance.

Repeat.

### CT Quick Roll Hand Ascender

The ultimate SRT climbing ascender. Fits all common rope sizes. The micro pulley gives you a mechanical leverage, making it easy to pull your weight up the rope. Can also be used with a foot loop for the most effortless way up a rope. See page 69 for more information.

**#CTQ**      **\$194.00**

### Kong Futura Hand Ascender

Ascender rope clamp for 8 to 12 mm ropes. These are minimalist hand ascenders and very compact. When used with a foot loop, you can use it to climb your rope. Left hand.

**#4073**      **\$120.00**

### Beal Hand Ascender

For SRT climbing. Can be paired with the Trango Pulley for a more economical version of the Quick Roll.

**#BHAR**      **\$98.00**

### Trango Pulley

**#TRPL**      **\$18.95**

Pulley paired with an ascender for an SRT setup

Pulley used for a friction free bridge pivot

### 8mm Rope Fixed Backup Bridge, Removeable

Recommended for any type of rope climbing or rappelling. 24" length.

**#8MBBC \$45.99**

with Carabiner

**#8MMWD \$29.99**

without Carabiner

### 8mm Rope Adjustable, Removeable Bridge

**#8MMAB \$56.99**

with Carabiner

### Replacement Amsteel Rope Bridge

Fully adjustable and openable bridge design, now comes in Amsteel. 33" finished length. Right or left hand use. Weighs 2 oz.; 3½ oz. with carabiner.

**#2527A \$59.99**

### SRT Throw Ball

12 oz.

**#25TB \$26.00**

### Compact SRT Kit

The hand ascender is connected to the adjustable foot loop providing a step up, sit down climb. It will fit most climbing ropes – 8mm through 11mm.

**#2524 \$144.00**

Compact SRT Kit Includes:

- Hand ascender
- Carabiner
- Adjustable foot loop

### SRT Foot Loop

Can be used with any of the SRT Ascenders.

**#SRTFL \$19.00**

### SRT Throw Line

70' of throw line used to get your main line into the tree.

## Versa Loop n' Lock Bracket Set

The Versa Loop n' Lock (patent pending) is an innovative, lightweight, simple, and safe bracket used to attach a climbing stick to a tree, and it is meant to supplement or replace Versa type buttons on multiple new and/or existing climbing sticks. It is designed specifically to be mounted on and used only in conjunction with certain tree climbing sticks which have a square or rectangular primary support post with flat face surfaces measuring 3/4" - 1" wide.

Included is the Loop n' Lock bracket, stainless steel mounting hardware, 1/8" x 8' Amsteel attachment rope/tether, installation and use instructions, and Warnings and Responsibilities disclosure.

Don't compromise...get the best, and HUNT BETTER!

**#VLB** **\$33.95**  
Kit. (It does one stick.)

**#VLBO** **\$19.95**  
Bracket only.

## Hunt Cleat for One Sticks

A non-moving quick cam option for your one stick, to use instead of the Harken Cam Cleat. Simple, easy, silent.

- NO Moving Parts
- 6061 Aluminum
- Ambidextrous, use left or right
- Same Bolt Pattern as the common used cleat
- Compatible with 1/8 - 3/16 Rope (Must Use Full Bury.)
- Made in USA
- Weight Limit: 450
- 1.6 oz.
- 2.25"L X 1.25"W X 1.125"H
- Works on all OOAL Climbing Sticks, One-Sticks and most other popular sticks

We recommend 1/8" Full Bury rope for the Hunt Cleat

The Hunt Cleat can be ordered on your one stick for for a **\$12 upcharge**

**#FB8** **\$19.99**

**#HC** **\$64.95**

## Harken Cam Cleat for One Sticks

Bolts included. Specify type of stick. 1", 1 1/4" or Shikar.

**#2504** **\$49.00**

## One Stick Rope

Replacement rope for one sticks. 3/16 bury one stick rope. 7' long.

**#6038** **\$34.00**

## Meredith Stick Holster

The all new stick holster is what you've always wanted. Access your sticks at any time using one hand. No more carrying sticks under your arms, or climbing up and down to retrieve sticks. Holds 4 sticks, individually strapped on, ready to release with ease and silence.

Standard size fits most sticks on the market. Order size wide if you have Helium, Skelators or Hyperlite sticks..

**How does it attach?** The stick holster utilizes standardized PALS/MOLLE webbing at the top of your saddle with more attachment options coming this summer.

**Works perfectly with:**

- Arsenal (Air, Cloud Series)
- Buzzard Roost Reloaded
- Cruzr (Drifter, S, XC)
- Latitude (Lonestar, Maverick, Method 2 or 3)
- Tethrd (Carnivore, Phantom, Ultralock SD)
- Timber Ninja
- Trophyline Venatic

**DOES NOT work with these saddles:**

- Cruzr Archon
- Hawk Hammock
- Tethrd (Ultralock, Workhorse)
- Trophyline (Covert or Nimbus)
- XOP Mutant

Easy, one handed release

**#MSHR \$30.00**

Standard

**#MSHW \$30.00**

## Hang Free™ Endura Attachment System

The premiere Climbing Stick Attachment method on the market just got even better!

The 6mm Endura H.F.A.S.R. is the pinnacle of one hand operational attachments. It simply doesn't get better than this! Endura uses the same fiber as AmSteel Blue for the core of the rope but covers the core with a polyester sheath. This allows for better durability, easier adjusting, a unique look, and most importantly, it breaks free much easier.

**#HFASR \$32.00**

1/8", 8 ft.

## Dead Silent Systems

### Amsteel® Daisy Chain

Shown with Shikar 17" climbing stick

All of our daisy chains are made from Amsteel®. These daisy chains make attaching climbing sticks to the tree fast and quiet. The absence of anything metal allows for whisper quiet attachment and packing.

The links are 2.5" making these easy to get on and off of any versa button. Also available in a heavier 1/8" thickness to use on platforms.

For sticks we recommend a double wrap, meaning to around the tree, under the button, and then around the tree again, pull tight, then loop into the closest loop. Much better than a single wrap.

Available in black!

Super compact!

**#6022** **\$22.00**

Daisy Chain, 7.5'

**#2023** **\$24.00**

1/8" Daisy Chain, 6'  
For Platforms

### Dog Bone Extenders

Two foot extensions for your other straps or daisy chain. Very handy. We recommend these for the original Cranford steps.

**#6034** **\$8.00**

Black

8" loop used to attach a stick to your saddle as you climb.

### Amsteel® Loops

These are handy in many ways. Add loops to your aider or attach to your saddle. The 8" size can be used to hang your sticks from your saddle as you climb.

**#6036** **\$5.25**

Orange Loop, 6"

**#6037** **\$7.00**

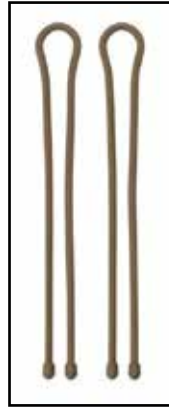

Black Loop, 8"

## Gear Ties

Useful in so many ways, this is one of our most used accessories. The 18" or 24" gets used to tie sticks together, while the 12" sees uses as a tether locker or attaching our platform to the saddle or a back pack. Rubber coated with a wire core.

**Specs:**

- Comes in 2 pack
- Choose Orange or Black

**#5059** \$6.99  
12", 2 pack

**#5060** \$9.90  
18", 2 pack

**#5062** \$13.98  
24", 2 pack

## Stealth Strips

Silence and camo all your gear! Remove the clink and clank of your sticks fitting together, or any other metal to metal contact. Self adhesive strips are easily cut to fit.

**#5040** \$9.00  
Sizing: 4" x 24" Roll

**#5040XL** \$24.95  
Sizing: 4" x 72" Roll

## Stick and Gear Straps

A quiet, simple and secure way to strap sticks, platforms or whatever. Tough, stretchable rubber. 18" long.

**#18GS** \$9.25  
Per each

## HangFree™ EZ Clips

Unclip your stick easily!

Great for carrying your sticks or platform up the tree. Comes with 6" Paracord loops and a ¼ Quick Release side buckle. Easily girth hitch one side to your saddle and the other to your stick and up you go.

**#5001**      **\$3.25**

## HangFree™ Gear Zips

XL size is shown for hanging a climbing stick. Simply loop over the top step and pull tight.

Standard size

Hang Free's Amsteel® Gear Zip (2 pack) is adjustable via a built in whoopie sling, ensuring you never lose or drop any gear! It is incredibly easy to use. You can have it attached and your gear cinched down in seconds!

Comes in black in regular or extra large size.

Made with a small fixed loop to girth hitch onto the Molle Webbing of your saddle and adjustable loop for hanging sticks, lineman's ropes and much more.

Cinch your gear and you'll never lose or drop another piece of gear again!

For climbing sticks, we recommend the XL size.

**Note:** Don't cinch too tightly, as it will be harder to slide the loop open.

**#5002**      **\$8.60**

Standard size, 2 pack

**#5003**      **\$10.34**

Extra Large size, 2 pack

## Hang Free™ Molle Webbing Clip with Loop

The clips fit 1" Molle Webbing and has been designed to make climbing easier. The clips allow for you to quickly hang gear on your saddle's Molle loops.

Features an attached continuous loop for easily hooking on your climbing sticks.

Simple design, tough carbon fiber composite, quiet / easy to use. An easy way to carry your platform or sticks up the tree.

**#50645**      **\$8.99**

## GC ONE Movable 3-Step Aider

Built with the same quality and pride we put into all of our other products, the GC-ONE Aider was specifically designed to work on the Tethrd One Stick but has quickly become a go to aider for a wide variety of double-step sticks in the 16"-18" range. A 3/16" shock cord allows the GC-One to be stretched over the ends of the steps, giving it a snug fit so you can be confident that it will not move. We also designed the leash to allow you to pull the aider off of the step without having to bend over, making for a very smooth and effortless climb.

While the GC-ONE will work on all double- step sticks within the 16"-18" range, it may not come off the steps with the leash leaving you to reach down and manually remove the GC-ONE.

This aider makes a great combo with almost any double step climbing stick. With 3 sticks and this aider you can climb 20 plus feet quickly and easily. Remember to properly use your linemans belt when using this aider.

**#4023**      **\$89.95**

## Movable 3-Step Hook Aider

by Backwoods Mobile Gear

Built to function like the GC-ONE but with the S-hook that allows you to hook it to the bottom step of a stick. Also used with the V-Step system. Sturdy and well built.

**#4027**      **\$84.60**

## Movable 4-Step Hook Aider

by Backwoods Mobile Gear

Just like 3-Step aider shown above but in a 4 step version for use with V Steps.

**#5244**      **\$99.00**

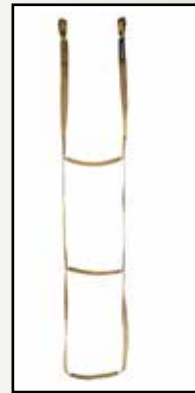

**Single Step Sewn Climbing Stick Aider**

**#4020**     **\$17.25**

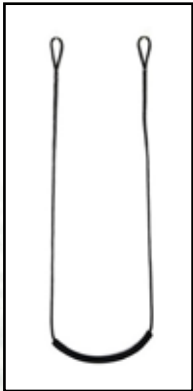

**Double Step Sewn Climbing Stick Aider**

## Gear Hugger Belt

A good value in a light, easy to use gear belt.

**#5065** **\$14.25**

## Fold n Go Gear Hanger

The perfect companion to your HYS Strap. Simply slip into the loops, all set, folds up out of the way if necessary.

**#24FG** **\$21.90**

## HYS Strap

The ultimate public land legal gear hanger. You can hang it. You can girth hitch it. You can T-Hook it. You can wrap it around a tree trunk. You can wrap it around a branch. Whatever works for you.

The HYS Strap is made of high strength, mildew and rot resistant polyester that enables you to hang your stuff in whatever way makes sense to you. Put some stuff around the back side of the tree, some on the left, and some on the right. You can easily move your gear and position it wherever it makes sense for your style of hunting. To attach it, simply girth hitch it with any of the existing loops, or use the included T-hook for a quick connection. If you hunt small trees, cut it to length. You won't hurt anything.

The Fold n Go (above) works perfectly with the HYS Strap. You can use S-Biner Hooks for your gear.

- 7' long can be cut to length for hunter preference
- Ultra-light at 6 ounces
- ¾" webbing for ultra-packability
- 1¼" distance between "links"
- T-Hook included
- Coyote tan for maximum concealment

HYS Straps are not intended for life support systems like a lineman belt or tether.

**#5066** **\$30.99**

Easy to hook on.  
Pull to tighten.

Compact nesting  
package

## Compact Gear Hanger Strap

Taking a proven design and making it even better with a folding bow hook that nests with the included gear hooks for a more compact package. Plus you get the benefit of the hook folding up out of the way.

3 gear hooks plus folding bow hook.

**#2450**      **\$44.00**

## Folding Bow Hook

The perfect bow hook for the mobile hunter. Slips into the loops on the HYS or Latitude straps, or any other strap.

**#5067**      **\$26.50**

Attaching a platform to your saddle for the climb up.

## S-Biner Gear Clips

Such a simple idea, so many uses. We use them to hang our platform from the saddle as we climb, or use them to attach your GPS, binoculars, etc. to your pack.

**#5063**      **\$4.75**

Size 4 - per each

## Hero Clip

The hook that does it all - swivels, folds, clips. Use as a bow hook or gear hanger.

**#HCL**      **\$34.95**

## HD Gear Hanger Strap

3 quiet, sturdy hooks. A great value.

**#GHHD**      **\$24.99**

## Latitude Bite Bow Hook

Durable aluminum construction with a rubber coated folding bow hanger. The swiveling tree stand off gives you extra stability for those heavy loads.

**#LATBH**      **\$34.50**

## HPE Hip Pinch Eliminator

Considered one of the best new products from last year. This is a great way to make your saddle even more comfortable. No more hip pinch! Very simple to use and can be quickly unhooked if needed. One end can be locked to the saddle bridge so you don't drop it accidentally.

Simple attachment.

Sturdy aluminum core. 2-piece design.

**#HPE** \$48.00

Easily folds in half.

Compact size stows in a pouch.

## Hang Free™ Bridge Bar

Easy to use. Simply clip into your carabiner and slip the bridge over it to provide a noticeable difference in pull angle. Durable and quiet and stays up out of your way.

**#HFBB** \$29.95

## Economy Spreader Bar

No frills, just function. 14" wide. Lightweight, silent.

**#TUSB** \$34.00

## Knee Pad Eliminator

The ultimate in comfort for your knees. Lightweight and strong aluminum with a dense foam pad. Packs easily and attaches with a strap and cam lock. Rock solid on the tree. Comes with an elastic cord to give you options for attaching to your platform for packing or storage. We highly recommend these. Your knees will thank you!

**#25KPE**

**\$89.99**

## Knee Pads

The ultimate in comfort and knee protection for those extended hunts.

**#LATKNEE**

**\$74.99**

## Knee Savers

Trophyline Knee Savers are the final step in comfort when using any of our tree saddles. A set of Knee Savers can quickly and quietly be put on over your exterior clothing and be adjusted to fit anyone. These heavily padded Knee Savers will allow you to sit for long periods with your knees against the tree.

- Easy On-Easy Off straps with quick snap buckles
- Soft rubber cup
- Extra foam padding for all day comfort
- Thigh strap is elastic and moves with your body
- Calf strap is fixed webbing for secure placement
- Straps are extra long to go over layers of clothing in colder months

**#5045**

**\$29.99**

## Scorpion Gear Hook / Retriever

Left your pack at the base of the tree? No worries, this will bail you out. Small, light and folds into an easy-to-store position. Locks into open position.

**#24TSH**     **\$44.95**

## 550 Paracord

Paracord is the hunter's friend. From bow ropes to tie downs, this is tough stuff. We use it as presets for SRT rope climbing.

**USE TIP:** Replace your trail camera straps with paracord to help keep them unnoticed.

**#5005**     **\$4.99**

25'

**#5502**     **\$46.00**

250' Roll

**#5501**     **\$105.00**

1,000' Spool

## Tether Locker

This is a must have addition to any rappel kit! Keeps your rope snug and tight to the tree, but allows easy adjustment and removal.

**#5074**     **\$18.00**

## Aider Management

### Pack n Play Plus

Pack up your aider like a pro with this handy roll flap. Simply roll up and cinch tight. To drop the aider, just unhook the G hooks. Color varies.

**#244LPP**     **\$39.95**

Updated design now features an interior pocket and super quiet fabric.

## Huntin' Hoist

The Huntin' Hoist is a self retracting hunter's rope for tree stand hunters. Model #230 has 30 feet of braided rope in its tough injection molded case. The rope pays out as you climb and reels in as you lift your gear into the tree. Slack is eliminated so you never end up with 30 feet of rope in your lap or in the briars at the base of your tree. Its super duty belt clip easily attaches to your trouser or fanny pack belt as well as the strapping on any tree stand. A lanyard attachment point allows you yet another fastening option. We used it for our rappel pull down rope and found it to work very well.

As if the product wasn't unique enough it also features Doyle's Gear Cinch a patented choker that eliminates the flimsy plastic and noisy metal clasps common on hunter's utility ropes. The Cinch conforms to any shape effortlessly grasping your bow and arrow, gun or gear. Attach your gear to the Hoist with Doyle's Gear Cinch and climb. Leave your rope worries behind!

**#DHH** **\$34.99**

30' length

## Pocket Pull Up Rope

25 feet of tangle free dyneema cord with a snap and handy flip-open winder spool.

**#PPU26** **\$9.95**

## Arsenal Micro Retrax™ Hoist

Engineered from the ground up for mobile hunting, the MICRO RETRAX™ packs premium retractable performance into an incredibly small, lightweight profile. Its quiet mechanism, rubber-overmolded shell, and compact form make it the ideal hoisting solution for hunters who demand stealth, efficiency, and zero unnecessary bulk.

**#1510** **\$39.00**

## Ape Canyon Back Band

The best way to add support to your saddle for those long days in the tree. Simply slip the back pad around your upper or lower back and under your arms. Clip nylon webbing strap into your Bridge carabiner. Pull the side adjustments to adjust length to your liking. Lean back and relax!

- Back padded area is 29"l x 4.75"W
- Totally adjustable using the side adjustment. You're able to pull it as tight as you want or let it way out to use like a recliner.
- Won't dig into you
- Easily rolls up and stuffs away for easy transporting

**#5042** **\$29.99**

## Twisted Iron Pack Rat System

The Pack Rat is the ultimate saddle hunting gear pack, designed as a universal platform and climbing stick carrier that streamlines your mobile hunting setup. Built for efficiency, it allows you to carry your platform and sticks securely - while doubling as a knee pad once in the tree.

The innovative center channel design keeps your platform locked in and center while the vertical stick carry eliminates hang-ups during your hike in and out of woods.

- Built in Knee Pad - no extra gear needed
- Universal pack with Molle - adaptable to your style
- Modular system - works with the Tree Hugger, BBPRO, or stand alone

**#TIPR \$139.99**

Mossy Oak (does not include stick straps, see below.)

Your platform fits inside.  
Shown in Mossy Oak Camo

Shown with Stick Straps installed

Use as a knee pad

Securely holds your gear

Pairs up perfectly with the Tree Hugger Organizer for an all-in-one system

## Climbing Stick Straps

**#CSS4 \$24.99**

Black or Orange.

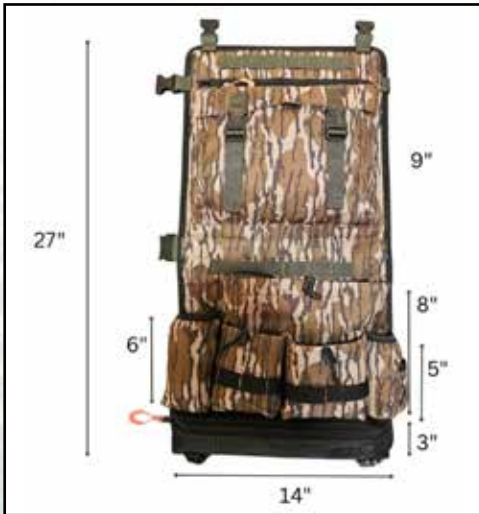

## Twisted Iron TreeHugger

The Tree Hugger is our personal hunting gear pack designed for quick access, quiet movement, and efficient organization in mind. It can be used on its own or paired with the Pack Rat (or Pack Rat XL) for the ultimate saddle hunting gear setup. This modular hunting pack system keeps your essential gear exactly where you need it – no digging, no noise, no wasted movement. Pre-pack your gear and once in position, open and strap directly to the tree.

- Fast Setup - Prepack gear, open cover flap, strap to tree
- No more digging- pouch style pockets keep gear accessible

## Big Game PacSeat®

The Standard Big Game PacSeat® offers a comfortable 18" sitting height and doubles as a PacFrame, giving you a versatile setup for carrying gear and taking a seat wherever the woods tell you to stop. It's a trusted companion for long sits, still hunts, and all-day adventures afield. Measures 37" tall x 14" wide. The sitting height is adjustable from 16" to 18". Sitting weight capacity of 400 pounds. When used as a PacFrame, the carry weight capacity is 250 pounds. The PacSeat itself weighs approximately 4.2 lbs.

- Ultralight. 4.2 lbs.
- Super comfortable
- Quiet
- Converts to a PacFrame with a load shelf

#WBCS **\$219.00**

## Ghost Blind Predator

It becomes any natural camo pattern you want it to be. Constructed of fluted polypropylene the back side of the blind has the Ghost Blind camo pattern while the mirrored panels on the front side of the blind are made of a lightweight and weather-resistance polystyrene that resists breaking or cracking. The pre-angled mirrored panels reflect the earth's ground floor and natural surroundings. The Predator Blind is a 4 panel unit made for those who want to hunt sitting comfortably in a chair. Great for hunting with gun, compound bow, crossbow or traditional bow. Blind weighs 12 lbs. 102"W x 46"H. When folded it measures approximately 16" x 25½". Includes blind, 2" carry straps, 4 tent stakes, 4 tie downs, 2 bungee cords and set up instructions.

## Ghost Wolf 3D Ghillie Suit

Unrivaled 3D Hybrid Camouflage: Our exclusive Fieldcraft 3D hybrid pattern features an intricate, multi-layered design of realistic leaves, colors, and textures mimicking nature itself. This innovative camouflage breaks up your human silhouette, eliminating sharp outlines and creating an organic, natural appearance that fools even the keenest eyes in the field. Move through dense foliage or open terrain with confidence, knowing you're virtually invisible.

### Lightweight & Breathable

Comfort: Constructed from high-quality, breathable polyester mesh, this ghillie parka offers exceptional ventilation, preventing overheating during prolonged use in warm weather. The lightweight fabric ensures maximum mobility and comfort, allowing you to stalk, observe, and engage without restriction (even Archery hunters).

**#GWG**      **\$129.00**

## Titan 3D Leafy Suit

Made of a strong Breathable-No-See-Um Liner, the 3D leafy suit is very breathable. Unlike traditional ghillie suits, the 3D leaves do not catch on branches or pick up twigs and stickers. The detailed deep leaf cuts make the leaves stand out more, giving you more depth in your 3D profile. A special material is used that produces a soft yet firm leaf. This causes the leaves to protrude more but also allows them to sway in the wind. The jacket has an attached hood with a draw cord to cinch up tight to your face, 2 zippered pockets and elastic on the waist. Snaps keep the front closed. The pants have elastic cuffs and an elastic waist with a locking draw cord. Carry bag included. Specify camo choice and S/M or L/XL when ordering.

## Wiggy's Ultralight Waders

Packs super small and gets you across dry! What are dry feet worth to you?

#WWA      \$149.00

**Sizes:**

- Medium – shoe sizes 7-9
- Large – shoe sizes 10-12
- XL – shoe sizes 13-14

These slip on over your boots. If in doubt on size, size up.

**Customer Testimonial:**

*If you do wilderness hiking with stream crossings you should have these in your backpack. Light and easy to put on/take off. I do a lot of hiking in the Smokies and there can be 10-15 stream crossings on a day hike that are up to 2' deep. These are perfect. They slide on and off over my boots quickly. Because I keep my boots on I get great foot protection while crossing the creeks. They also dry off quickly, unlike my water shoes. Great grip on the slippery, moss covered rocks. I have had mine a couple years and use them on most hikes. Still look brand new and zero leaks. When they do wear out, i'll be ordering another pair.*

Field Spray

Laundry Wash

## Deception Scents

Kill more than just deer. Kill your scent first.

Provides a remarkable solution to eliminate scents. Our Laundry Scent Eliminator is used to pre-treat your clothing and gear between trips to the woods. This will also remove any sour smells from your washer! This product has been around for over a decade eliminating odor in different industries. Eliminate your scent, and be more unseen! Use the Field Spray on your boots, pants and other gear for that final edge.

**#6050** **\$14.99**

## ZULU6 HDX PRO Image Stabilized Binoculars

The ZULU6 HDX PRO Image Stabilized Binoculars set a new standard in optical clarity and stabilization with reengineered lens coatings, prescriptions, and settings that are built to impress even the most discerning optics aficionados.

Available in 14x, 16x, and 18x magnification, the ZULU6 HOX PRO combines ample power with a generous Apparent Field of View (AFOV) and light gathering capability as the result of the larger 50mm objective lenses. SIG SAUER's new HDX PRO™ lens system significantly reduces ambient glare, improves overall light transmission by 25%, and increases color accuracy to deliver an unrivaled Twilight Factor during the most critical moments of the day.

OmniScan™ is the latest OIS™ (Optical Image Stabilization, software update which seamlessly blends Scan and Target modes using a digital accelerometer to automatically adjust the degree of stabilization based off movement. The slower the binoculars move, the greater the degree of stabilization applied and vice versa. OmniScan eliminates the need to toggle between settings, delivering the most advanced stabilization experience we've ever created.

The ZULU6 HOX PROs are powered by two common AA batteries, providing 40+ hours of constant runtime. The battery compartments have been relocated to opposing sides of the binocular body, creating a more comfortable in-hand feel.

## Low Down™ Trail Cam Viewer

A trail cam viewer that really works!

- SnapShot - new feature allows you to save video freeze frame and turn it into a "snapshot" which can be saved as a picture as well as easily enlarged for close-up viewing.
- Easy Scroll - move from start of the SD card to the end with a touch of your finger, even with thousands of pictures.
- No more micro SD save card! Low Down™ now uses only full-size SD cards up to 128gb!
- Built-in navigation "help system" - no need to read any instructions.
- You can use LOWDOWN to format your SD cards too!

**#LDV \$349.99**

- 7" Color touch screen
- Plays 1080p Video
- 2 SD Ports
- Zooms, swipes and navigates
- Primary port houses SD card with full library of images and videos
- Secondary port saves favorites to designated archive SD card
- Built-in speaker supports audio during video playback
- Holds 2 SD cards up to 32GB each
- 3.5mm headphone jack
- Wildgame Innovations Trail Pad Tablet SD card viewer includes screen protector
- Requires 4AA batteries

## Trail Pad Viewer

**#TPV \$199.00**

## SD Memory Card

Quality 16 gb SD Card.

**#5032 \$14.95**

## Wildgame Spark 2.0 Camera Combo

## Tethrd SABr Limb Saw

Cuts like a tiger, packs up fast.

**#SABR \$69.99**

## Kozy Kote

Finally, a good body suit for saddle hunters. Stay Kozy warm on those icy winter hunts. Magnetic arm openings, removable booties. Custom sewn slots for your saddle bridge. Must be used with a clip on type bridge. we can modify any bridge to be clip on. Call us with questions.

Rolls up into a sleeping bag size with included backpack straps. Comes with removable snap-on blaze orange vest.

The benefit of separate booties is it's much easier to put the suit on. We recommend putting the booties on first, then slipping into the legs. This keeps the suit legs cleaner inside.

Medium - under 5'10" tall  
 Large - over 5'10" tall  
 XL - over 6'1"

Available in Camo

**Includes:**

- Suit
- 2 Booties
- Snap on orange Vest

**#KQKT \$479.00**

Call for sizing questions.

**#KQKTW \$499.00**

Now Available in Snow White  
 Order early - Not a Stock Item

While not considered waterproof, this suit is very water resistant.

## Timber Ninja Frostline Boot Warmers

Finally, a lightweight, packable warmth system for those chilly, frosty mornings and late season hunts.

Every component of the Frostline system was chosen to keep you warm during long sits without adding bulk:

- Neoprene Shell - Highly water-resistant, windproof, and low-bulk so it packs tight and deploys fast.
- Fleece-Lined Interior - Soft, silent, and warm for all-day comfort in freezing temps.
- Toe Handwarmer Pocket - Slip in a heat pack for instant warmth at the coldest point of your boot.
- Cold-Blocking Bottom for elevated hunting  
 The closed-cell PE foam in the bottom is the heart of the Frostline warmth system. It creates a barrier that blocks the cold transfer from aluminum or steel platforms - a must for saddle hunters and treestand hunters who spend hours on metal surfaces that drain heat rapidly.

**#TNFL \$99.00**

**Sizes:**

- Regular - fits men's size 9-11
- XL - fits men's size 11½ - 15

## PCP Air Rifles

PCP (precharged pneumatic) air rifles are a complete game changer in air power. Now consistent, repeatable accuracy is within reach. Using high pressure air chambers, multiple rapid shots can be taken with great accuracy. Usually 30 to 40 shots can be taken with consistent power before needing to repump the chamber.

PCP Air guns easily reach out to 30–50 yards for small game and plinking, while being much safer than a .22 rim fire.

Note: We have other models available.

### RWS Pellets

Provide top consistency and accuracy.

**#RWS \$10.75**

## Blowguns for Fun and Small Game

Large caliber blowguns like this .625 Magnum have an effective range out to 20 yards or more. With practice, a skilled user can hit a two-inch circle at amazing distances, delivering a heavy weight dart. That's a payload easily capable of penetrating a half-inch sheet of plywood. Accuracy and range like this enable an experienced hunter to take small game like doves, quail, squirrels and rabbits in complete silence without danger of over penetration or errant darts striking livestock or humans in the distance. Shooting a blowgun is great fun. It is an activity that can be enjoyed indoors or out, in sunny or inclement weather. Skill with a blowgun can lead to many inexpensive hunting adventures. Shorter blowguns are more maneuverable, while the longer ones are easier to aim and produce more speed and power.

### Big Bore .625 5 Foot Blowgun Kit

Max power and range. Comes with a mouthpiece, rubber ferrule, dart quiver, and 36 darts (6 Stun darts, 15 Mini Broadhead darts and 15 Bamboo darts).

## In Pursuit of Trophy Whitetails The Final Chapters

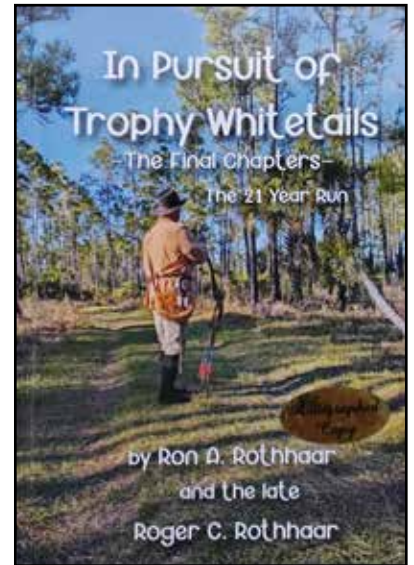

by Ron A. Rothhaar and Roger C. Rothhaar

Highly entertaining and informative. The late Roger Rothhaar was the founding father of today's trophy whitetail legacy.

Roger's son, Ron, presents a collection of Roger's whitetail wisdom and shares his own story of 21 years of trophy bucks with a recurve.

Ron's writing on thermals and wind currents are worth the price alone. Hardcover. 245 pages.

**#RRW \$49.95**

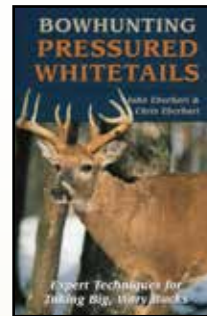

## Bowhunting Whitetails the Eberhart Way

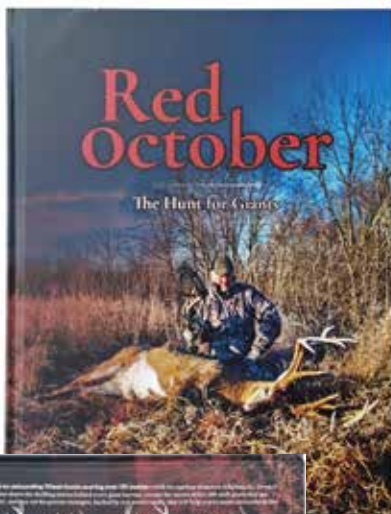

## Mapping Trophy Bucks

by Brad Herndon

If I could have only one book on deer hunting, this is the one. Filled with real life stories and examples, each chapter brings a wealth of knowledge about the use of terrain features and how deer move through them. Paperback. 191 pages.

**#24MTB \$39.95**

## Red October

The New Release by Adam Hays –  
**The Ultimate Whitetail Hunter's Bible Has Arrived!**

If you're obsessed with arrowing monster whitetails, this is the book you've been waiting for – a heart-pounding, can't-put-it-down masterpiece that will revolutionize the way you hunt!

This stunning 8.5 x 11" hardback coffee table book is a visual feast packed with jaw-dropping color photos and the raw, real-world wisdom from 45 relentless seasons of chasing giants.

Adam Hays isn't just another hunter – he's a proven legend who has harvested FOUR massive bucks exceeding 200 inches with a bow (and 15 total over 170 inches!), including some of the most epic trophies ever taken on camera and in the field.

Inside these pages, Adam reveals his battle-tested, no-BS system – the exact strategies, tactics, setups, and mindset that have consistently put him in bow range of the biggest, oldest, and smartest whitetails on the planet.

Hardcover. 250 pages

**#RED \$84.00**

## Ultimate Guide to DIY Bucks

by John Eberhart and Greg Godfrey  
**3 Book Set**

In the "Ultimate Guide to DIY Bucks," John Eberhart and Greg Godfrey combine their 88 seasons of extensive deer hunting knowledge to craft the definitive handbook for whitetail hunters, no matter their weapon of choice. In book volume 1, John distills his 58 seasons of hunting pressured whitetails exclusively on public and free-permission lands, offering detailed strategies and insights into the following chapters: In-depth Introduction of contributors and purpose of the book series, Hunting Pressure Realities, Saddle Hunting, 4 Segments of the Season, Post Season Scouting and Early Season and Lull. No matter your level of hunting skill, each chapter provides the practical advice needed to outsmart the wariest of whitetails, with real-world examples in the form of 76 condensed kill stories with pictures. With Greg having hunted deer in 16 states and John in 7, their goal is for you to understand deer behavior and master proven hunting tactics, techniques, and strategies to the point that no matter where in the country, or type of terrain you hunt, you are a serious threat to mature whitetails.

### VOLUME 1

- 1 – Introduction
- 2 – Hunting Pressure Realities
- 3 – Saddle Hunting
- 4 – 4 Segments of the Season
- 5 – Post Season Scouting
- 6 – Early Season and Lull

Forward by Gene Wensel

The solo spirit will stir your soul as you become part of the natural world of Alaska, the Rocky Mountains, and the Midwest.

Experience the people and events which inspired the author to the realization that even in solitude, we are never truly alone. Paperback, 333 pages.

**#MMIW \$29.95**

## The Enchantment of Bowhunting

by Mike Mitten

"Mike has captured the passion for traditional bowhunting from the spinning feathers of an arrow in flight, to the blood trail, to the prayer of thankfulness for a tagged animal. The pages of this book flowed from the heart of a man after God's own heart. The Enchantment of Bowhunting is a careful stalk through the wilderness of solitude. It's the tingling of the hair feeling of being watched from the shadows; it's the ivory flash of an antler caught by a ray of sunlight; it's the earthy smell of raw meat while packing moose in dense brush in bear country, and the soft glow of a small fire warming your face as a wolf moans a stones-throw away." *From the Forward by: Monty Browning*  
Hardcover. 317 pages.

Introducing

## Finewire™ Heating Elements & Plugs

Finewire™ heating elements are composed of hundreds of interwoven, steel microfibers coated with a heavy-duty polymer. These highly conductive bundles are then woven into fabric panels. This unique craftsmanship separates us from other brands that use less durable materials like carbon wires, which easily break down over time. Our design produces an extremely durable product that heats faster and lasts longer, ensuring comfortable warmth during any activity.

## Product Warranties

- 1 Year - Manufacturer Defects and Workmanship
- 90 Days - All batteries
- 2 Years - All Controllers
- **Lifetime Warranty - Heating Elements AND Clothing Plugs**

## How is Heated Clothing Powered?

	7V Gear	12V Gear
<b>Main Power Source</b>	Each product includes a small, rechargeable 7V lithium-ion battery	Connect to a 12V power source using a Battery Harness, 12V Accessory Plug, SAE to Coax Female, or RCA to Coax Female

### What Makes Us Special?

#### LIFETIME WARRANTY

We stand by our products with a lifetime warranty on the Finewire™ heating elements & clothing plugs

#### DON'T CUT CORNERS

One of the only companies with gloves heating both sides of the hand and socks heating the entire foot

#### NO BUTTONS ALLOWED

Temperature controllers are separate from the clothing because when heat control buttons on clothes fail outside of your warranty, you're left in the cold

#### QUALITY CLOTHING

We invest in only the best materials including Cordura®, Thinsulate™, Kevlar®, Hipora® and Ripstop Nylon

## 7V BATTERY-POWERED CLOTHING COMMON QUESTIONS

### WHAT KIND OF BATTERY IS IT? WHY 7V AND NOT 5V WITH A USB CHARGER?

It is a rechargeable 7V Lithium-Ion battery available in both a 3500mAh and 2500mAh version. We use 7V instead of 5V because it allows us to increase the amount of heating element in our gear while still preserving long running times. More heating element equals more heat, and therefore a better-quality product for our customers!

### HOW LONG WILL THE 7V BATTERY POWER MY CLOTHING & WHAT ARE THE SETTINGS?

The length of time ranges from 2-11 hours but depends on the specific product connected & temperature setting. For example, a vest is 2-8 hours, but a headband is 3-10 hours.

The battery's built-in controller has 4 power levels to control the temperature output: 25%, 50%, 75%, 100%. The temperature output ranges from approximately 105°F to 135°F or more.

### HOW DO I CHARGE THE BATTERY & WHAT'S INCLUDED WITH THE CLOTHING?

The battery can be charged using our 7V Wall Charger or Car Charger. It typically takes 4-5 hours to fully charge a completely discharged battery (longer when simultaneously charging 2 batteries on a dual charger). All clothing comes with everything needed for operation.

	Batteries	Wall Charger	Y-Harness
<b>Socks</b>	2	Dual	Yes
<b>Gloves</b>	2	Dual	No
<b>All Other Clothing</b>	1	Single	No

### WHAT IS THE TYPICAL LIFESPAN OF A BATTERY?

When cared for properly, its lifespan is up to 500 charge cycles. To extend the life of your battery, maintain at least a 25% charge when not in use. Do not store it in extreme hot or cold environments for extensive lengths of time to avoid battery malfunction or decreased performance.

### WHAT IF THE 7V CLOTHING OR 7V BATTERY GETS WET?

The battery is built to be water-resistant and withstand most weather conditions. However, the battery is not meant to be submerged in water or other liquids. All our clothing wiring is sealed with a heavy-duty coating, so there is no risk if it gets wet.

### CAN I CONNECT MY 7V CLOTHING TO A 12V POWER SOURCE?

Yes! With the Hybrid Heat Controller, you can power 7V battery-powered heated gear using a motorcycle, powersport vehicle, or any 12V accessory port.

Intrigued by the challenge of the craft, Roman Hershberger designed and built his first bow in 1990. For the next 18 years, he produced a handful of bows each year, as time allowed. By 2008 he was ready for the next step and Hill Country Bows was born. Based on customer request, a unique line up of bow designs evolved over the next 12 years. Today, Hill Country bows are in customer's hands all over the country as well as internationally.

## Gallery of Custom-Built Bows

### The Badger

Our latest design in a short hunting bow. 52" to 60".

Highly reflexed limbs provide a silky smooth draw and blazing speed.

### The Wildcat

Our most popular model. Available in Recurve and Longbow.

Very popular with 3D Tournament archers, with many first place wins, including an IBO World Championship.

#### Pricing

- One piece bows start at \$800.
- Take Downs start at \$950 for basic models.
- We attempt to keep some stock bows on hand. Call for current listings.
- For full custom orders, expect 12-18 months for completion.
- We have many special woods available for custom order bows.
